The White House, 1600 Pennsylvania Av. N.W.,  
Washington, DC 20500.  
USA

Home-Office Aeschlen BE, may 16<sup>th</sup>, 2025

Dear Mr President,

As CEO of a Swiss company and founders of the Swiss Association for Space Energy, we are confronted with a case of FBI attacks on a friendly company in USA. Dr. Robert Holcomb from Sarasota, FL, has invented a revolutionary energy machine, which Prof. Tim Vaughan calls the "greatest invention in history". We are convinced that this was not the official FBI, but a covered organization set up by the Deep State to destroy such technologies and their creators on order of vested interests.

Since we know that you are fighting the Deep State, we are turning to you in confidence to make these attacks known.

The fact is that the so-called FBI didn't identify themselves and that they cleared out half the lab. Since the Holcombs are being pursued in the US, we invited them to Europe and Switzerland, where these technologies are highly estimated. They informed us on May 11 that learned via their lawyer that a public We ask you to protect this company and this people and to evaluate their technology which can be demonstrated. They have a technology that would be a **gold mine for the USA to make America great**

We are also cooperating with the German and Austrian Associations for space energy (ÖVR & DVR). On the other side we are in contact with the Swiss government to implement such technologies instead of nuclear power plants.

With respectful greetings

**Attachments:**

- Report about the "FBI"-raid in our NET-Journal
- Test report of Paul Fiano Kobolt Maritime Professionals from 10<sup>th</sup> may 2025

Supported by ÖVR

DVR

Dr. Thorsten Ludwig

**Remark:** Space energy (from electrons) are the real source of the new energy used in this technology.

**again** and would also solve the energy problems. This technology can be licensed on the basis of numerous patents, and therefore result in significant savings in various areas of application in the electrical industry **and can stimulate a multibillion market.**
